

PATENTED For high-precision sharpening of saws

AUTOMATIC SHARPENER FOR GRINDING TIPPED SAW

TOP-ANGLE ONLY/TOP-ANGLE AND RAKE-ANGLE TYPE **TN-7**

Grinding of top angle

Features

- All the settings for the type of teeth are made on the touch panel.
- The numerical drive acts on the values you have input to set a combination of teeth.
- The grindstone angle is set under numerical control.
- Overall throughput and sharpening speed per tooth are steplessly regulated.

SPECIFICATION

● Permissible grinding dimension	152mm~510mm, 152mm~610mm (Top only)
● Permissible grinding pitch	5mm~80mm
● Tooth feed speed, grinding speed	5P~16P (Per minute)
● Grinding tilt angle	0°~20°
● Grindstone dimension	140mm
● Grindstone rotation	4,500rpm
● Drive motor output	400W
● Cutting oil motor output	40W
● Grindstone motor output	750W
● Machine floor area	575mm×755mm
● Overall machine height, width, and depth	1840mm×920mm×850mm
● Machine weight	520kg

In our efforts to constantly make improvements,
these specifications may change without notice.
